

# CRB CALL TO ACTION!

## Coconut Rhinoceros Beetle (CRB) infestation impacts us all!

CRB have already devastated palm species on the North Shore, Central Oahu, and other areas, and are now here in Kailua and on the Windward side.

Coconut trees are foundational to Hawaii's cultural heritage, agriculture, ecosystems and economy, and **we need YOUR help to stop the spread!**

## WHAT YOU CAN DO NOW

- **RECOGNIZE** CRB infestation when you see it.
  - ✓ Learn how to identify infestation at: <https://www.crbhawaii.org/about-crb>
- **PREVENT** CRB spread on your property.
  - ✓ Learn about the following at: <https://www.crbhawaii.org/treatments>
    - Methods for preventing CRB from breeding on your property.
    - Methods for protecting palms from CRB infestation on your property.
    - Methods for treating palms on your property once CRB infestation is present.
  - ✓ Be open to evidence-based alternative management solutions, as we learn more about this devastating infestation.
- **STAY INFORMED and BE AWARE OF RESOURCES AVAILABLE**
  - ✓ Sign up for quarterly CRB Newsletter: <https://www.crbhawaii.org/the-crb-response>
  - ✓ Visit: <https://www.crbhawaii.org/publications>
  - ✓ Visit: <https://dlnr.hawaii.gov/hisc/plans/hawaii-crb-communications-plan/>
  - ✓ Support legislative actions aimed at eradicating CRB.
  - ✓ Sign up to receive regular updates from your local representatives.
